Hard Skills

-HTML, CSS, and
JavaScript (ES6+)

-UX Design

-Figma's Design
Software

-AI output/generation.

Soft Skills

-Team Collaboration

-Prioritized Time
Management

-Lateral Problem
solving

Web Developer

About Me

Aspiring Web designer at the Center for Advanced Research and Technology with an interest in Game Design, and seasoned in user input, and web application. Contains professional skills such as collaborative ethics, cognitive problem solving, and creative storytelling. Seeking out new entry-level, tech filled, collaborative opportunities.

Projects

Fresno Chaffee Zoo Project

- Developed a more user-friendly Enrichment tracking interface for the FCZ.
- Designed a much simpler method of logging enrichment with a group of 5.
- Tweaked the User flow to be more interactive, and intuitive using Figma's design tools.

PawPal Pet Tracking Site

- Created a Pet tracking Website, and mobile application.
- Contains scheduling features, special need care, and exercise logging.
- Tomogatchi-themed front.
- Used JavaScript's versatile binding to design logging, account saving, and editorial need functions.

Bio-Shield/AI Experimentation

- Used AI generative functioning to create a site for a bug extermination company.
- Prompt engineered the output, and experimentation of the AI based on what was asked of it.

Education

Center for Advanced Research and Technology (CART)

2025 - 2027

Currently enrolled in Web Application, and Design, and will transition to Interactive Game Design at the end of the year.

Clovis High School

2023 - Present

Expected Graduation is 2027, and focused on heading to big tech UCs such as UC Santa Cruz, and Monterey Bay.
